

Operator Actions Required

AI Business OS - 25 March 2026

#	Action	Time	Priority
1	Fill in Holding Company BRIEF	15-30 min	HIGH
2	Create Etsy Seller Account	20 min	HIGH
3	Regenerate Etsy API Shared Secret	5 min	HIGH
4	Google Workspace Authentication	10-15 min	MEDIUM
5	Install EverBee Chrome Extension	2 min	LOW

5 actions that only you can complete. The system is ready to start making money once Actions 1 and 2 are done.

Action 1: Fill in Holding Company BRIEF

Time: 15-30 minutes | **File:** holding-company/BRIEF.md

Open the file and fill in:

- Business goals (what does success look like in 6 months? 1 year?)
- Budget constraints (how much can you invest monthly?)
- Risk tolerance (conservative, moderate, aggressive?)
- Time availability (hours per week for this?)
- Any specific interests or expertise to leverage

Why: The business-advisor agent reads this for every strategic decision. Without it, all advice is generic.

Action 2: Create Etsy Seller Account

Time: 20 minutes

1. Go to <https://www.etsy.com/sell>
2. Create a seller account (sign in or create new)
3. Follow the setup wizard (shop name, payment, billing)

Why: This is the #1 revenue blocker. The system has products ready to create but nowhere to list them.

Action 3: Regenerate Etsy API Shared Secret

Time: 5 minutes

1. Go to <https://www.etsy.com/developers/your-apps>
2. Click "Regenerate" next to Shared Secret
3. Win+R then sysdm.cpl then Advanced then Environment Variables
4. New user variable: ETSY_SHARED_SECRET = (paste new secret)

5. Verify ETSY_API_KEY also exists as a user variable
6. Restart VS Code for changes to take effect

Why: Original secret was exposed in chat history. Security requirement.

Action 4: Google Workspace Authentication

Time: 10-15 minutes

1. Open VS Code terminal
2. Run: gws auth setup
3. Follow browser prompts to sign in with Google
4. Grant permissions when prompted
5. Verify: gws auth status

Why: Enables Google Drive delivery (review briefs accessible from any device), Gmail notifications, and Calendar integration.

Action 5: Install EverBee Chrome Extension

Time: 2 minutes

1. Chrome Web Store - search "EverBee"
2. Install the free version
3. Visit any Etsy listing to see analytics overlay

Why: Shows revenue estimates, search volume, and competition data when browsing Etsy. Essential for niche validation.

What Happens After You Complete Actions 1 and 2

Once those two actions are done, the system will:

1. Run the full venture launch pipeline on your first niche
2. Create POD designs via ChatGPT/Gemini browser automation
3. Write SEO-optimised Etsy listings (titles, descriptions, 13 tags)
4. Compile everything into a PDF brief for your review
5. You approve, download designs, upload to Etsy
6. Scheduled tasks keep creating new products automatically
